> The marriage of Miss Lena Tirzah Brash, daughter of Mr. and Mrs. Samuel J. Brash, and Mr. Harry Willard Raymond, son of Mr. and Mrs. Perley B. Raymond, was solemnized at 3 o'clock Wednesday afternoon at the home of the bride's parents on College avenue. The appointments of the wedding, while simple, were beautiful. There were no attendants, the bride and the bridegroom following the minister, the Rev. G. A. Pollock, of Elgin, Ill., in the ceremony room. Great clusters of American Beauty roses combined with palms and group stood beneath a canopy of smilax, which was studded with white chrysanthemums. As they entered the room the wedding march by Mendelssohn was played by an orchestra, and while the Episcopal ring service was read the music was changed to "O Promise Me." The bride was handsomely gowned in a Louis XV coat, worn The coat was of pompadour silk of blue and white with a vest of white silk and a jabot of lace. The sleeves were to the elbow finished with a deep fall of lace. The skirt was cut with scallops with fagotted seams, worn over a pale blue silk skirt. Her hat was a picture hat of white beaver, trimmed with a long white plume and white roses, and her bouquet was of American Beauty roses. The guests included about fifty of the relatives and friends. A wedding supper was served after the ceremony. The several rooms were all attractively decorated with flowers and palms. Miss Hallie Buchanan at her home, 816 The class of January, '04, has chosen the following officers: Oscar Connor, poet; Louis Bohnstadt, prophet, and Elmer

Rashig, historian. A new set of officers has been chosen by the Tyroleans, a society from the class of January, 1903. They are as follows: Ella Glass, president; Ethel Goode, vice presi-Hattle Stowe, secretary, and Ina

Williams, treasurer. A girls' sorority in Room G has come into existence, and has the following membership: Emma Brandt, Carrie Eberhardt, Bettle Coulsin, Edith Ryan, Florence Hosbrook and Laura Benninghoff. A name for this organization has not yet been chosen, but this matter and a set of officers will be elected soon.

The Manual Training High School Literary and Debating Club will hold its regular weekly meeting in Room G to-morrow, and a very interesting programme has been arranged. American writers of the present time are being considered by the club, and the poet Longfellow will be discussed to-morrow A weather shelter, in which there is

placed in the north tower of the school building by the physiography department, of which Mr. Stuart is the teacher. The class will now be able to tell the sort of weather that is coming to Indianapolis as well as the local weather bureau. Room G has opening exercises every morning from 9:45 until 10 o'clock, which are exceedingly pleasant and much en-

joyed by the members of the room. Among

the best on the programme last week was a recitation by Oscar Connor, "Annabel Lee," by Edgar Allen Poe, followed by an original parody on the poem by Louis Bohnstadt. Enjoyable exercises were held in the auditorium of the school Friday morning, and a large number of visitors were present

who were here attending the Ohio Teachers' Association meeting. The selections of the Manual Training High School Orchestra, which now has thirty pieces, was a feature of the programme. The singing of "The Star-spangled Banner" by the school closed the exercises. The first number of the room paper in Room G was read during opening exercises

Friday morning. The best articles are to republished in the school organ. The staff for the next issue of the paper, which will come out in two weeks, was selected and is as follows: Literary editor, Effie Taylor; scientific, Walter Stewart; poetry, Willard Osler; athletics, Louis Bohnstadt; personal editor, Lincoln Dickey, and critic, A class party will be given on the even-

An executive committee, made up of Jean-nette Wright, Ella Glass, Maytle Taylor, Frank Welch and Charles Bragg, was appointed to make final arrangements for the coming class party.

The chairmen for the various committees on the Kellogg lecture, which is to be given in Tominson Hall on the evening of Dec. 1. have been chosen, and will now busy themselves in getting ready for the entertainment. Frank Welch will attend to the advertising, and James McPheeters will look after the decoration of the hall. Charles Jennings will assume the duties of press agent, and have charge of the tickets. Reserved seats are now on sale at the Manual Training High School office from 8:15 until 3:15.

In Room G Monday afternoon will occur the meeting of the M. T. H. S. Science and Chemistry Club. This organization meets every two weeks. Mr. Abbott, teacher of chemistry in the school, has asked permission of a number of manufacturing concerns in the city to take the club for a visit to the plants, and this will be done in the near future. Last year a number of profitable trips to the big manufacturing plants of Indianapolis was a prominent feature of the term's work of the Science Club.

The class of June, 1903, has chosen the students who are to be prominent in the class-day exercises. Lillie King will comoose the poem for the class, and Mary Dillingham will foretell the future of the members of the "naughty-three" organization. The history of the class will be told by Harry Carlisle. A committee has been appointed by the president to select a color for the class. It was decided early in the year to have old gold and violet, but the difficulty in getting the correct shades of these caused the organization to settle on one color.

IDYLLIC ISLAND LIFE.

No Drunkenness, Crime, Police, Jails or Courts in Cocos-Keeling. Pall Mall Gazette.

Away from the ordinary track of ships and blessed with a splendid climate are the Cocos-Keeling islands, in the Straits archipelago. Their history is as strange and romantic as their present life is curious and

In 1825 a Scotch sailor named Ross landed, and, seeing that the isles were very good, he took possession and settled there with his family. The natives were gentle and teachable, so that Ross had no difficulty in making himself their ruler. In 1851 he hoisted the union jack as a precaution against the visit of a wandering French man-of-war, and six years later the isles were formally annexed by the British government. With rare tact and wisdom Ross devoted himself to governing the people over whom he had so quaintly established himself as king, and on his decease he bequeathed his mission of government and proprietorship of the Cocos-Keeling to his son. The present owner and ruler of the visiting Mr. and Mrs. Timothy Miller, left islands, J. G. Clunies Ross, is the third in succession. He was studying engineering at Glasgow when his father's death called him to the fore fifteen years ago. Abandoning his European ambitions, he settled in his kingdom, married a Cocos wife and devoted his life to the welfare of the natives, who are his children rather than subjects. The work of the Rosses in thus ordering these East Indian islands forms fascinating story, and the Cocos-Keeling group, though generally unknown, is per-haps the most picturesque in the British empire. The little horseshoe-shaped cluster of islands, three days' steaming south of Java, are blessed with a perfect climate, luxuriant soil, and man here is seen at his

> The inhabitants number about 600, of whom 400 are Cocos born and the remainder coolie laborers from Java. Under the rule of the Rosses, the only white residents, schools have been established, and all the islanders are well educated, the schoolmaster-in-chief being A. Ross, a master of arts of Glasgow University. Every male is also trained to work in brass, iron and wood and is a skilled artisan. Every Cocos girl similarly serves a term of apprenticeship in Clunies Ross's house, learning sewing, cooking and the whole round of domestic art under the tuition of his wife. Formerly the Cocos' parents used to arrange their children's marriages, but under the new order each man and woman is a free agent, and chooses a partner according to European usage. Marriages are celebrated according to the Mohammedan law, but polygamy i prohibited, and there have been only two divorces in the last fifty years. There is nelther jail nor policeman, for crime does not exist in these islands. Opium and alcohol are forbidden, and the wily Chinese is also excluded. Vaccination is compulsory, and all sales are made by barter, for Mr. Ross will not allow money, holding it to be the root of all evil. The industries of the island consist in

gathering cocoanuts and preparing their oil and copra. Beche de mer and a bark for dying are also exported by a chartered vesel, which calls annually for the purpose. Provisions are fetched once a month from Batavia, but rice is the only food largely imported, for fruit abounds in the islands, poultry is plentiful and the sea teems with fish. The gentle and handsome native leads a life idullic in graceful content and happiness under the parental eye of Ruler Ross III. He carefully guards his little Utopia against the introduction of European customs with their attendant ills. Christmas island, close by, is similarly ruled by his brother, Andrew Ross. Coffee flourishes there, and so do rats and cats, almost to the extent of a plague. Hitherto these atoms of Britain have enjoyed serene isolation, but the new electric cable from Durban to Ade-Cocos-Keeling Christmas islands, so that they are now linked with the greater world, not, it is to be hoped, to the spoiling of their arcadian

REMEDIES FOR SNAKE BITE.

Such as Were Used in Olden Times-New Forest Snake Catcher.

London Lancet. The subject of snake-bite may occasion-

ally engage the individual practitioner in a moorland countryside, where, especially in the summer and autumn, cases are not unknown of infants dying from collapse after being bitten by vipers. We have recently been informed that the "infallible remedy" used by "Brusher" Mills, the well-known New Forest snake catcher, for the bite of the adder or viper is the fat of the creature itself melted, bottled and applied, a dorp at a time, to the wound. The cure, he asserts, is an affair of two minutes. Mills has, of course, had immense experience with snakes, having, in his day, killed or taken more than 4,000 venomous and 27,000 harmless specimens. He has, in fact, practically devastated his own field of operations round Lyndhurst. His belief in his remedy is shared by Wiltshire and Hampshire rustics and is doubtless universal in the country districts of England. The question is whether this treatment is

merely a survival of the old savage homoeopathy which ordains a hair of the dog that bit you as a cure for the bite, or whether it is a rude form of serumtherapy. Vipers are exceedingly quarrelsome from the moment they break the egg, and unless immune against venom would long ago have ceased to exist as a distinct species. Hence their fat may be a kind of antitoxin. Of course, all fatty and olly substances are useful against poisons, which they doubtless absorb and isolate. The old-fashioned "London viper catchers," mentioned by White of Selborne and others always employed hot olive oil as a cure or treatment for snake bite, and this with ammonia continues to be recommended.

We read of the oil cure in works on natural history, but find no mention of the peasants' use of fat. How came it to be used in the first instance? Probably in accordance with the savage theory that fat, blood sputum and so forth, contain the life principle or "soul" of men and animals and are, therefore, a cure for any lesion. Fat was anciently used to frighten away serpents from gardens and houses. The "suet of deer strewed up and down where they (adders) come, will cause them to depart," says Agrippa of Nettesheim, whose ideas, despite his skepticism, were often those of the tribal medicine man. Bacon fat, mixed with the brains of a weasel, is recommended by him to scare away rats and

Drugs and charms obtained from snakes are, of course, very ancient. The witches in "Macbeth" make a baleful viper broth, but the same mixture was also a medicine and cure for many diseases. The sloughs of snakes had also singular uses. The sixteenth century Jerome Cardan is quoted an old chapbook as saying, "If any do sprinkle his head with the powder of skin that a snake doth cast off, gotten or red when the moon is in the full, t ng also in the first part of Aries the Ram

SAVAGES IN SILK HATS.

Reformation of the Man-Eating Car-

London Mail. Civilization has killed the cannibals of Dominica. To-day there is but a remnant of the race of Caribs alive; probably not more than 120 full-blooded members (says Mr. Bell, administrator of Dominica, in a consular report just issued), and these are undoubtedly the last survivors of their race in the West Indies.

About 150 years ago they were treated by settlers like wild beasts and killed on sight. No efforts were made to take them alive. because as slaves they were valueless. But a hundred years of peace and protection have completely metamorphosed the Carib. Instead of a bloodthirsty, man-eating savage he is now as law-abiding and mild . subject as any the King has.

"He no longer paints crimson circles of roucon round his eyes and stripes of black and white over his body, but on high days and holidays he wears a tall hat and black coat. Instead of yelling round a sacri-ficial stone the Carib of to-day goes to confession to the parish priest, and tells his beads with edifying fervor.

In days gone by these Caribs would suddenly swoop round a Readland in their crowded canoes and swarin into the harbor of a peaceful settlement. Before the white men knew what had happened the redpainted savages were in their midst. In an astant the town was ablaze, and traders and artisans fell like sheep under the stone hatchets and tomahawks. Maddened by rum and gorged with plunder, the savages would hasten back to their canoes with their prisoners and loot.

The prisoners who were not wanted for immediate consumption were fattened for their religious festivals. Though Spaniards, Frenchmen, Dutchmen and negroes were ell ment to Caribbeans, they had their preferences. The French they declared to be the most delicate and the Spaniards the hardest of digestion. A communicative but fastidious Carib, who was overtaken by a traveler while gnawing at the remains of a boiled human foot, confessed that he only ate Arrowaks. "Christians," he said "gave him indigestion."
